

MANAGING CYBERSECURITY & COMPLIANCY FRAMEWORKS ISN'T EASY.

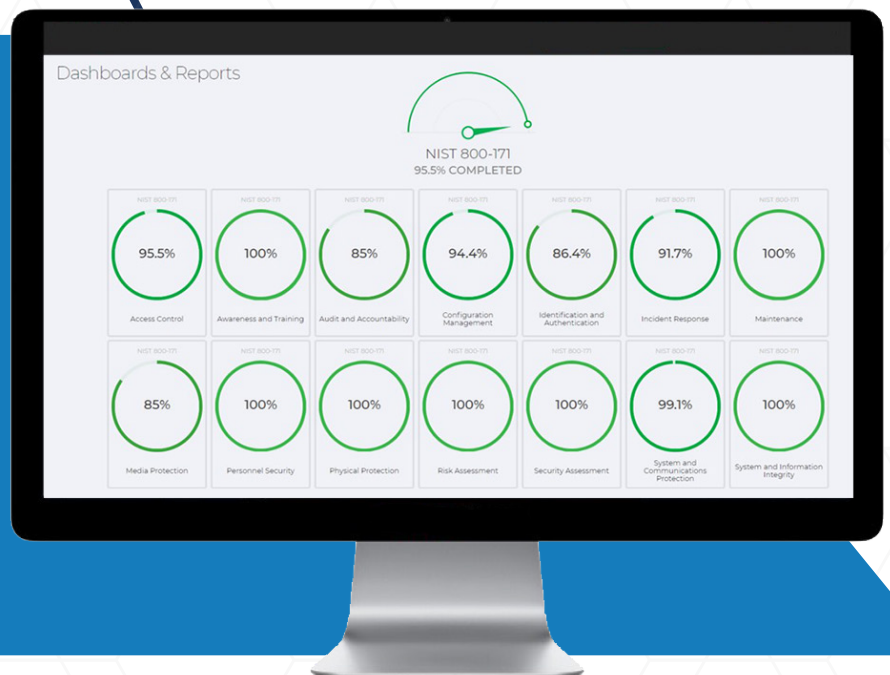

- Are you struggling to manage multiple spreadsheets to keep up with your company's requirements?
- Is it difficult to keep up with storing control family documentation or artifacts?
- Is it a challenge assigning tasks to departments that need to provide input on control and sub-control compliancy?

Athena makes collaboration, organization, and project management easy.

FINALLY

An easy-to use platform to manage your cybersecurity program. Athena maps multiple frameworks, tracks cybersecurity compliancy, and reports your program all in one click.

CONNECT

MANAGE

- One stop shop for security and compliance management
- Accessible across organizational functions
- Saves hours of manual tracking and administration
- Great visibility and control over security control programs

STEP 1:
Choose your framework

Many industry frameworks to choose from, such as NIST, GDPR, and PCI.

STEP 2:
Add Unique Items

Add items unique to your company's needs. Athena can customize your apps and programs.

STEP 3:
Assign Ownership

Cybersecurity responsibilities go across the organization. Assign ownership beyond IT.

STEP 4:
Delegate Tasks

Assign tasks to employees and set them to recur monthly, quarterly, or yearly to stay on track.

Athena

Stronger
Cybersecurity

STEP 6:
Continuous Monitoring

Provides ongoing maintenance and continuous monitoring to stay on top of things.

STEP 5:
Report on Progress

Build accurate, real time purpose built reports.
