Seasoned experts apply offensive and defensive strategies to strengthen resilience, speed compliance and protect critical infrastructure.

“Near-peer competitors are posturing themselves, and threats to the United States’ global advantage are growing—nowhere is this challenge more manifest than in cyberspace.”

GENERAL PAUL M. NAKASONE, U.S. ARMY | Commander, U.S. Cyber Command; Director, National Security Agency; Chief, Central Security Service
A Proactive Defense

Combining strategy with technology, Envistacom equips government with the right cyber defenses to protect national security and critical infrastructure.

We deploy a range of synchronized capabilities to help agencies adopt a proactive, compliant security posture. Our cyber professionals are former U.S. military leaders whose collective expertise spans IT, risk management, operations, threat assessment, and compliance. As a result, they bring a holistic view to problem sets that few cyber experts can support.

**FULL-SPECTRUM CYBER DEFENSE**

Through dedicated projects, Envistacom brings full-spectrum capabilities to help customers strengthen their security posture.

Our world-class team of cyber experts apply offensive and defensive strategies to manage risk from every angle. From testing and assessments to monitoring and response, our services give customers unmatched visibility and control of their cyber operations — enhancing their ability to preempt cyber threats.

**RESILIENCE AND COMPLIANCE**

Through ongoing engagements, Envistacom helps organizations keep pace with cyber threats and create a faster path to compliance.

Our teams work closely with customers to actively protect their IT infrastructures and the data flowing through them. Combining technical expertise with operational experience, we partner with them to implement the strategies they need to maintain cyber resilience.

At the same time, we bring tactical-level tools to help internal teams streamline their processes and procedures to stay compliant with regulations for data privacy and security.
Defensive Cyber Operations
• Cybersecurity
• Assessment and testing services
• System security engineering
• Threat and vulnerability management
• Risk Management Framework (RMF)
• Compliance management (14+ security frameworks)
• Event monitoring and incident response
• Penetration testing

Research, Development, Testing and Evaluation
• Electronic warfare
• Insider threat
• Offensive and defensive cyber
• Operational test and evaluation
• Live-fire test
• Joint Capability Technology Demonstrations (JTCD)
• Military utility assessments
• Requirements development
• Cyber Tabletop (CTT)

Cyber Intelligence and Support
• OSINT
• Cyber ISR
• Operational Preparation of the Environment (OPE)
• Cyber Operations Planning

Information Operations
• Information Operations Planning
• Joint Service training and support
• Advancement of sensitive and classified capabilities
• Assistance in policy and doctrine development
